

## Dewansh Parashar

dewanshparashar@gmail.com | +91-9711226304

Senior UI Developer/Engineer (web) with 4.5+ years of professional work experience, responsible for developing performant, responsive, flexible, and scalable UI using ReactJs. I am passionate about pixel-perfect product aesthetics (internal + external), product engagement, and optimization. My goal with every project is to make it the best looking and the best functioning in the given set of constraints.

### PROFESSIONAL EXPERIENCE

#### LogiNext Solutions, Mumbai — Sr. UI Developer, Design Manager

June 2016 - October 2020 (4 years 4 months)

- Key Highlight #1:** Designed and developed LogiNext LIVE; an interface for all logistics' real-time tracking and ad-hoc operations which proved to be a huge asset for the product reception and the business. Also, won the NASSCOM Design Award for presenting it.
- Key Highlight #2:** Developed a highly flexible and scalable map architecture atop LeafletJs, supporting use-cases involving various geometries: Polygons, Circles, Rectangles, Polylines (Routes), Heatmaps, Editing tools, Animations, various map providers like Google and OSM.
- Key Highlight #3:** Design Quality Automation: Initiated & delivered LogiNext Design Language aimed to document 100+ reusable components, standardizing our brand guidelines, drastically reducing the time to design new interfaces. I closely work with PMs to review the designs, before handing them over for development.
- Story Development:** My day revolves mostly around developing UI features of varying complexities using Reactjs, & code reviews within stipulated timelines in an Agile-Sprint Model, involving estimation, architecting, coding, coordination with different teams, and E2E ownership of the story.
- Performance Optimization:** Worked on benchmarking, and rendering optimization of the application eg. bringing down the memory consumption of our dashboard by 60% with 10k moving markers.
- Team Building & Mentorship:**
  - Conducted 70+ interviews to date to hire Senior & Principal UI developers. 1 UI/UX Designer and 1 UI Developer reported to me.
  - Trained, mentored & coached new team members, explaining the business use cases, functionalities, and engineering complexities of our flagship product MILE, while scoring a consistent 100 on the NPS scale.

#### Self-employed, New Delhi — Full-stack Web Developer

Dec 2020 - Present (4 months)

Developing a hybrid app using React-Redux, Capacitor, Firebase, and NodeJs.

### EDUCATION

#### Delhi Technological University, New Delhi — Bachelor of Technology (Computer Science & Engineering)

March 2012 - March 2016 : Courses: Software Development and 52 others.

### SKILLS & COMPETENCIES

**Core:** ReactJs, Redux, TypeScript, HTML, CSS, JS, AngularJs 1.x, JQuery, Bootstrap, Ionic, Jest.

**Plugins and Advanced:** Firebase, Google maps, LeafletJs, Charts, and Nvd3.

**Ops & Build Processes:** Webpack, Babel, Grunt, Gulp, Bower, Git

**Designing:** Figma, Photoshop, Sketch, Zeplin, Proto.io

**Database and Querying:** SQL (Basic), MongoDB.

**Communication:** English & Hindi, Good at Oration & Presenting

### AWARDS & ACHIEVEMENTS

**Winner, NASSCOM Design Awards 2019,** Presented LIVE - Design solutions that are designed to encourage the adoption of connected and intelligent technologies like Artificial Intelligence and Machine Learning.

**Speaker @ ng-India 2020** (India's Angular Developer Conference) titled "Creating Native Mobile Apps using Angular"

**Winner, Techathon 2019** (Internal hackathon at LogiNext) Created an in-house fully functional chat module in 24 hours.

**Winner, B-Plan Presentation 2019** (Internal in LogiNext) 1st position(out of 6 teams) in a startup idea presentation.

**Employee of the year, LogiNext (2018)** & Employee of the month, LogiNext (September 2016)
